1. Description

Integrate Google Analytics 4 (GA4) with the Falaq Food ERP/CRM system so authorized users can view key ecommerce website analytics directly from the ERP.

2. Business Requirement

The ERP should provide an Analytics section that retrieves data from the connected Falaq Food GA4 property and displays website traffic, engagement, and ecommerce performance.

3. User Story

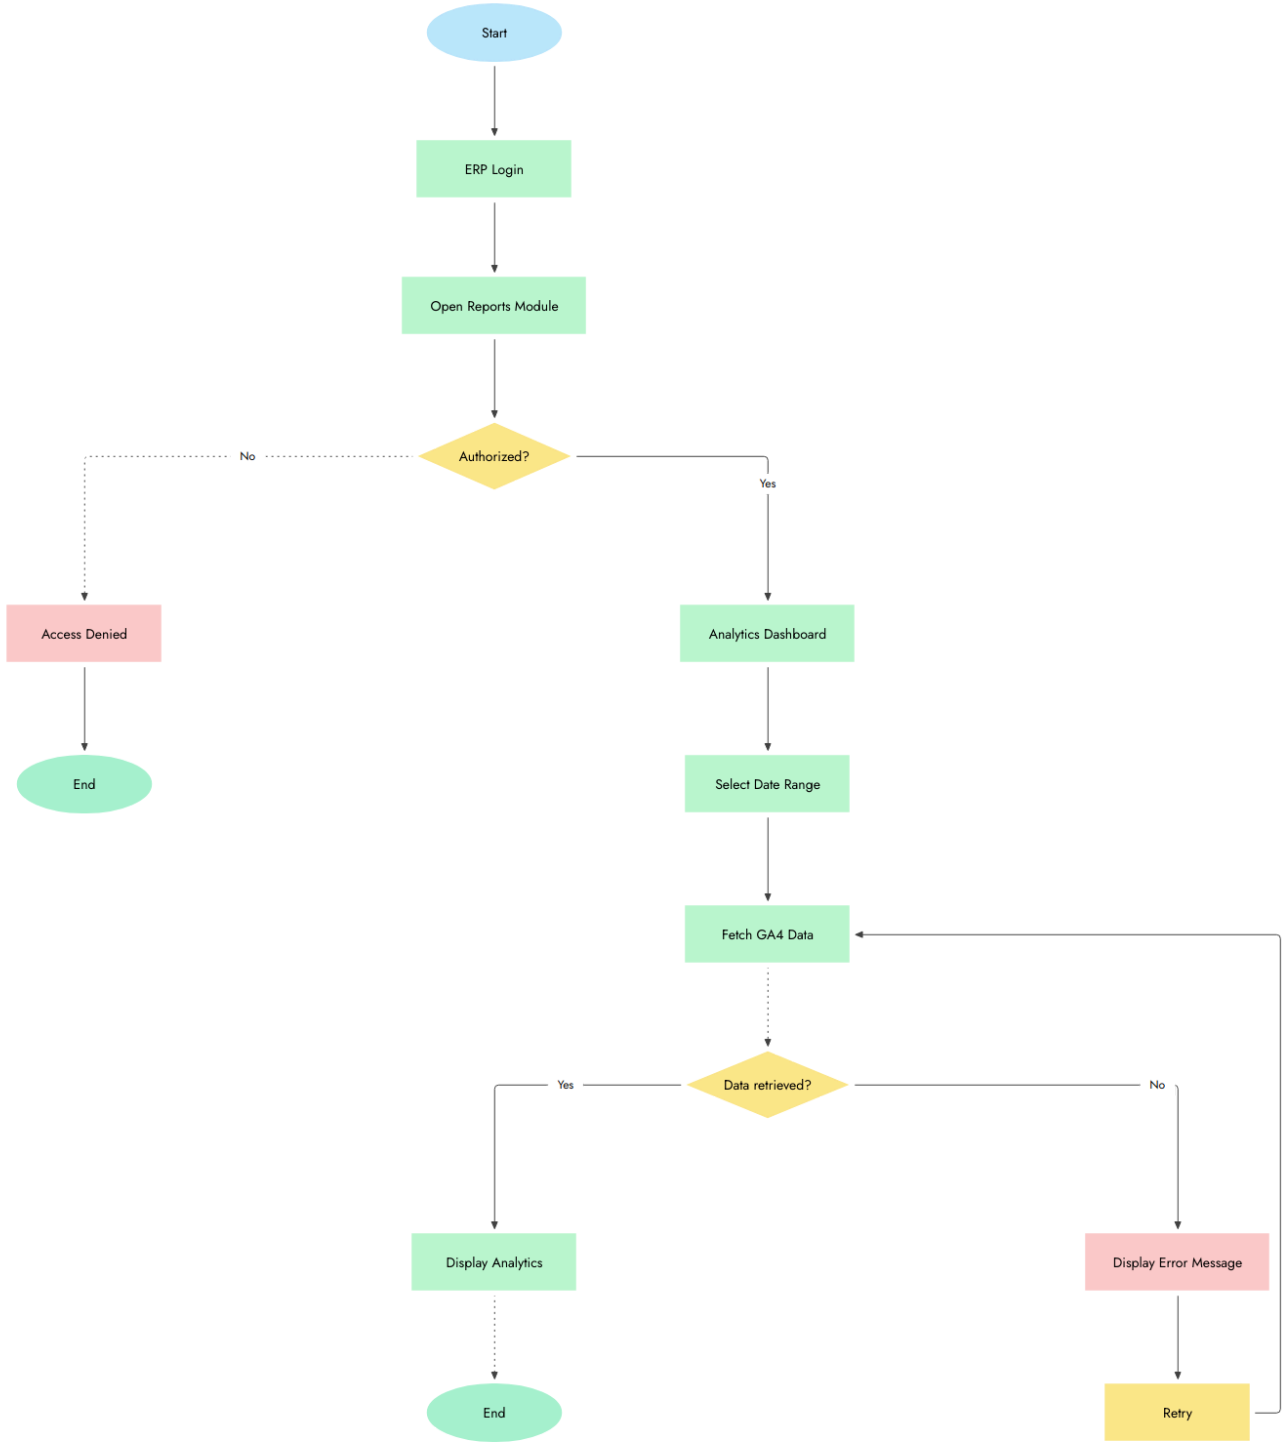

As an authorized ERP user,
I want to view Falaq Food's Google Analytics data within the ERP,
so that I can monitor website traffic, customer engagement, and ecommerce performance without accessing Google Analytics separately.

4. User Flow

ERP Login → Reports Module → Permission Check → Analytics Dashboard → Select Date Range → Fetch GA4 Data → Display Analytics

If the user is unauthorized:
Reports Module → Permission Check → Access Denied

Diagram:

5. Business Outcomes

Provides centralized visibility of website performance within the ERP.
Reduces the need to switch between ERP and Google Analytics.
Helps Marketing and SEO teams monitor traffic and user engagement.
Helps management track ecommerce performance and revenue trends.
