[Backlog] Product Performance - Extra Bucket Metric #1768

Open Feature

Assignees

Labels Week-6

qaakib02falaqdigital opened 1m ago

1. Description

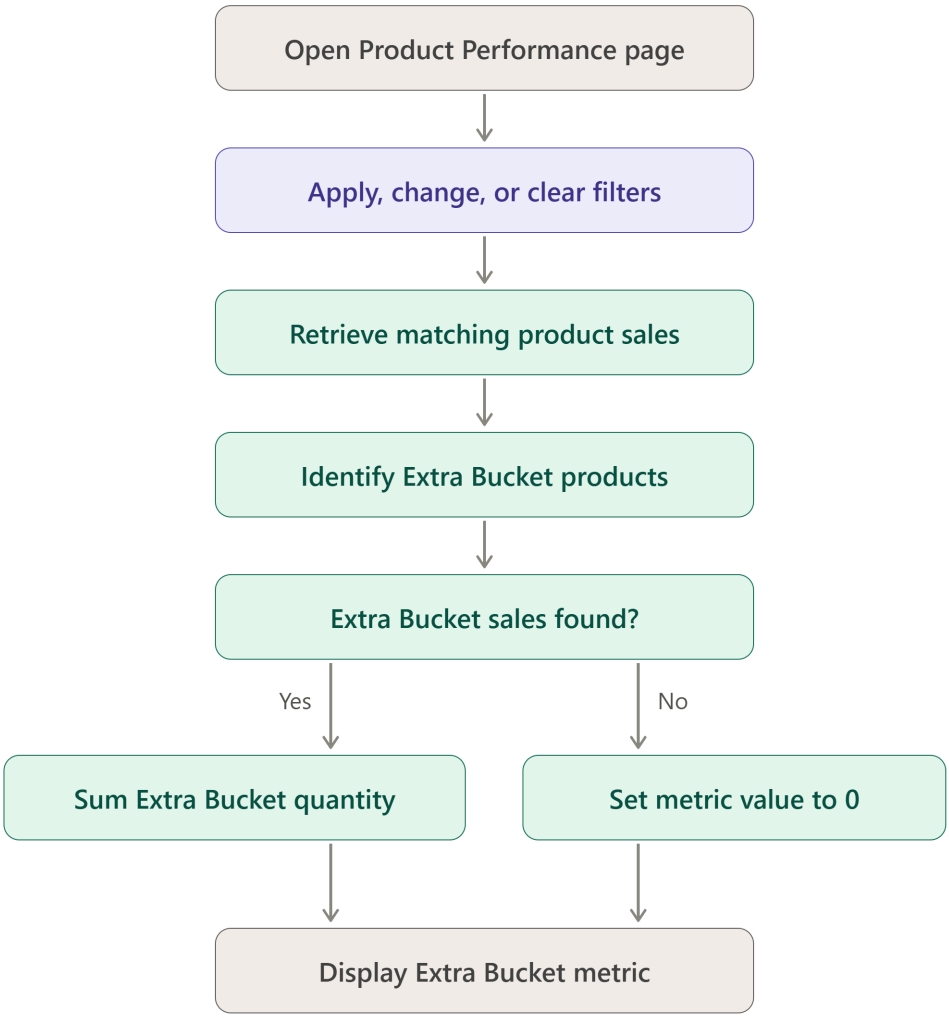

Add an Extra Bucket metric to the Product Performance page so the Inbound Team Lead can track how many products were sold as Extra Bucket products based on the selected filters. Because currently which products were added as extra bucket and how many is not measurable.

2. Business Requirement

The Product Performance page should include a new metric named Extra Bucket, displaying the total quantity of products sold as Extra Bucket products.
The metric must respond dynamically to all available filters on the Product Performance page. When a user applies or changes any filter, the Extra Bucket metric should update accordingly.

3. User Flow:

Product Performance Page → Apply Filters → Retrieve Matching Product Sales → Identify Extra Bucket Products → Calculate Total Quantity → Display Extra Bucket Metric
