

Reports Module - Order Analytics [Test Scenarios]

Prepared by: Akib Rahman

Metrics:

1. Total Orders

Business Logic

Counts all orders created within the selected date range.

Test Scenarios

ID	Test Scenario	Expected Result
TO-01	Verify total orders for Today	Count matches database/orders list
TO-02	Change date range	Metric updates correctly
TO-03	No orders exist	Displays 0
TO-04	Cancelled orders included/excluded according to business rule	Value matches requirement
TO-05	Refresh page	Count remains consistent
TO-06	Timezone boundary (11:59 PM / 12:00 AM)	Orders belong to correct day

2. Average Order Value

Business Logic

Average Order Value = Total Revenue ÷ Total Orders

Test Scenarios

ID	Scenario	Expected Result
AOV-01	Verify formula	Matches calculated value
AOV-02	One order only	AOV equals that order value
AOV-03	Zero orders	Shows 0 or "-"
AOV-04	Refunds handled correctly	Matches business rule
AOV-05	Decimal values	Rounded correctly

3. Completed Orders

Business Logic

Total orders that are completed, not in pending, processing, working or cancelled.

Test Scenarios

ID	Scenario	Expected Result
CO-01	Count completed orders	Matches database
CO-02	Status changed to completed	Metric increases immediately
CO-03	Completed outside date range	Not counted
CO-04	No completed orders	Displays 0

4. Not Completed Orders

Business Logic

Total orders that are not completed, in pending, processing, working or cancelled.

Test Scenarios

ID	Scenario	Expected Result
NC-01	Verify count	Correct
NC-02	Completed order removed from count	Count decreases
NC-03	Pending/Confirmed/Working included	Based on requirement
NC-04	No pending orders	Shows 0

5. Average First Response

Business Logic

Average time between

Order Created → First Agent Response

Test Scenarios

ID	Scenario	Expected Result
AFR-01	Orders with response	Average calculated correctly
AFR-02	No responses	"-" displayed
AFR-03	Response after several hours	Included correctly
AFR-04	Date filter applied	Recalculated

Charts:

6. New vs Return Customers Chart

Business Logic

New Customer = First purchase

Return Customer = Purchased previously

Test Scenarios

ID	Scenario	Expected Result
NRC-01	First-time customer	Counted as New
NRC-02	Existing customer	Counted as Return
NRC-03	Percentages add to 100%	Correct
NRC-04	Legend values match pie slices	Correct
NRC-05	No customers	Empty chart or "No Data"

7. Orders by Mobile Carrier

Business Logic

Groups orders based on customer's mobile operator.

Test Scenarios

ID	Scenario	Expected Result
MC-01	GP orders	Count correct
MC-02	Robi orders	Count correct
MC-03	Banglalink orders	Count correct
MC-04	Airtel orders	Count correct
MC-05	Teletalk orders	Count correct
MC-06	Unknown operator	Goes to Other

MC-07	Percentages total 100%	Correct
-------	------------------------	---------

8. Orders by Shipping Zone

Business Logic

Groups orders according to shipping area.

Test Scenarios

ID	Scenario	Expected Result
SZ-01	Inside Dhaka orders	Count correct
SZ-02	Sub Dhaka	Count correct
SZ-03	Outside Dhaka	Count correct
SZ-04	Percentage correct	Matches calculation
SZ-05	Invalid address	Handled according to rule

9. Orders by Source

Business Logic

Groups orders based on creation source.

Test Scenarios

ID	Scenario	Expected Result
SRC-01	Website order	Counted under Storefront
SRC-02	Telesales order	Counted under Telesales
SRC-03	Percentages	Total 100%
SRC-04	Legend count	Matches chart
