Description

When an agent is assigned only the OrderQualityAnalyst role and attempts to view the action history of an order, the complete history is not displayed.

Preconditions

- An agent has only the OrderQualityAnalyst role.
- An order has gone through multiple stages/dispositions and contains multiple action history logs.

Steps to Reproduce

- From the Admin panel, assign an agent only the OrderQualityAnalyst role.
- Log in using the OrderQualityAnalyst account.
- Open an order that has multiple completed stages/dispositions.
- Open the Action History / History section & review the displayed history logs.
- Compare the logs with those visible to an Admin or TeleSalesAgent for the same order.

Expected Result

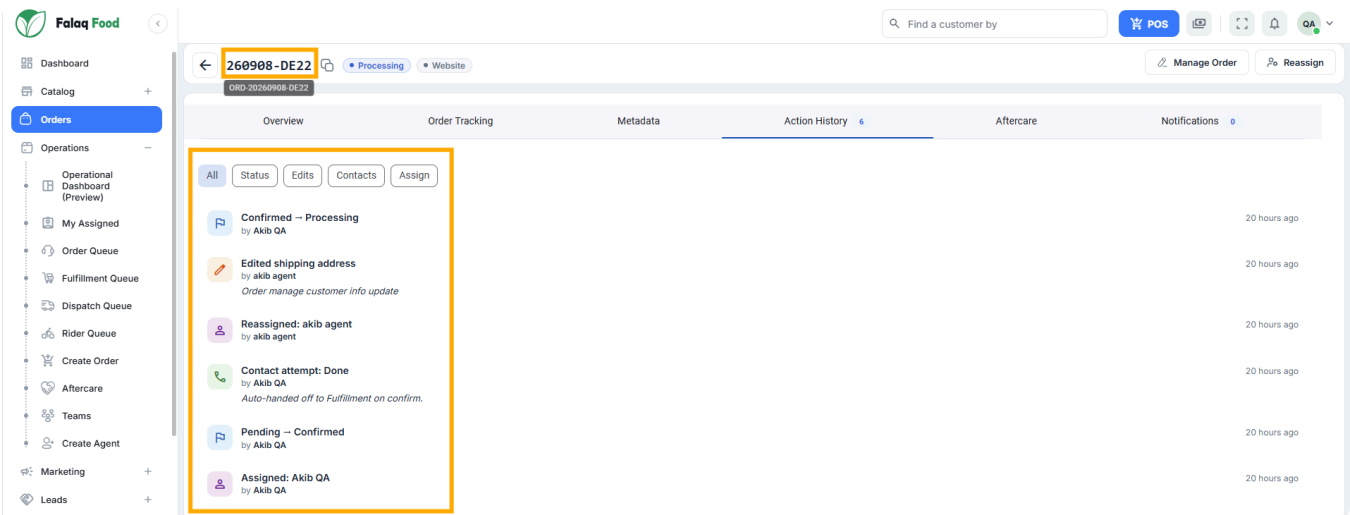

The OrderQualityAnalyst should be able to view the complete action history of the order, including all dispositions, stage changes, status changes, assignments, and other relevant history logs that are visible to Admin or TeleSalesAgent.

Actual Result

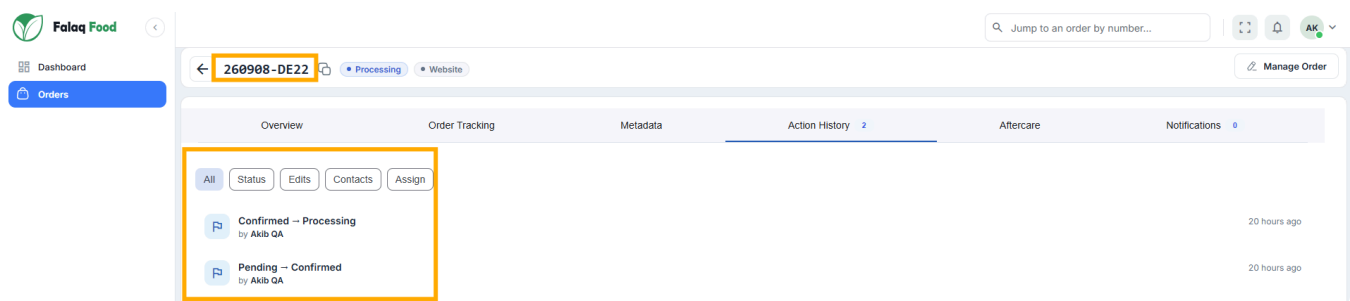

The OrderQualityAnalyst can only view some of the order history logs. Certain completed stages/dispositions and their corresponding actions are missing from the history.

Screenshots

1. Viewing an order action history as admin

2. Viewing same order history as OrderQualityAnalyst
