

Teams

Operation Module - Teams; Business Logics

Metrics / Function	Definition	Example	Comment
1. Total Teams	The total number of teams that are available in the system.	1. There are 15 teams available in the system. 2. Admin created 1 new team. 3. Admin deleted 2 teams 4. Total Teams = 14	Teams can have members or may not have members. Doesn't affect total team count.
2. Total Members	Total number of agents who are assigned to any of the teams.	1. There are 50 Telesales agents in the system. 2. 20 of the agents are assigned to some teams. 3. Total Members = 20	Agents who aren't part of any team are not counted here.
3. Empty Teams	Teams that do not have any members assigned to them.	1. There are 15 teams 2. 13 teams have assigned members 3. Empty Teams = 2	
4. Create Team	Create a new team with a mandatory name. (Description is optional field)	1. Total team was 15 2. Admin created a new team 3. Total team = 16	

5. Search Team	Search any team by it's name.		Searching by member name will not work.
6. Edit Team	Edit a existing team. Editable fields are Team Name & Description.	1. A team's name was Team A 2. Edited and saved team's name as Team B	Adding team member is available in View team.
7. View Team	View details of a team and can add new member. Add members: Only members that are not part of any team can be added. **Once a member is added, cannot remove the member from the team. Members can only be removed from a team by deleting their account.**	1. A team has 3 members. 2. Added a member who was not part of any team. 3. Total member = 4 4. Deleted that member's account. 5. Total member = 3	
8. Delete Team	Only empty teams can be deleted. Teams cannot be deleted if they have active members assigned. First need to delete the Id's of assigned members in order to delete the team.	1. An empty team available. Delete = Successful. 2. A team has one assigned member. Delete = Unsuccessful
