Title: Product (Oats) marked Out of Stock in Admin still appears In Stock on Storefront

Module:

Catalog → Products / Storefront

Environment:

Production

Severity:

High

Priority:

Urgent

Description:

When Oats is marked as Out of Stock or its stock quantity is set to 0 from Admin → Catalog → Products → Oats, the storefront still displays the product as In Stock.

Steps to Reproduce:

- Log in to the Admin Panel.

- Navigate to Catalog → Products → Oats.
- Set the product stock quantity to 0 / mark it as Out of Stock.
- Save the product.
- Open the same product on the Storefront.
- Check the product's stock availability.

Actual Result:

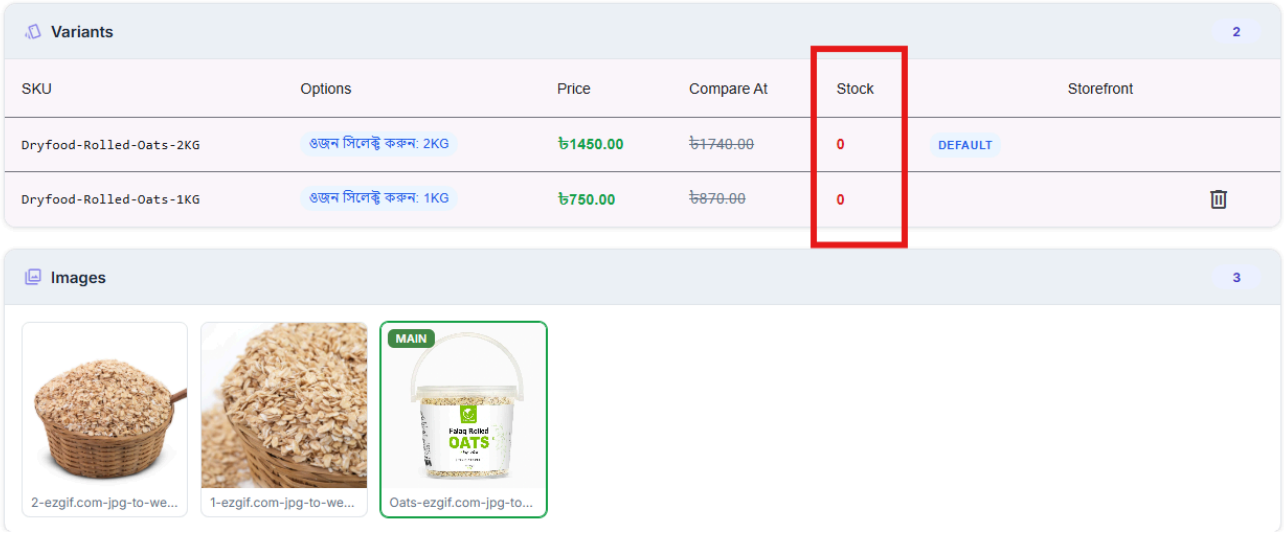

The product is displayed as In Stock on the storefront even though its stock quantity is 0 / Out of Stock in the Admin Panel.

Expected Result:

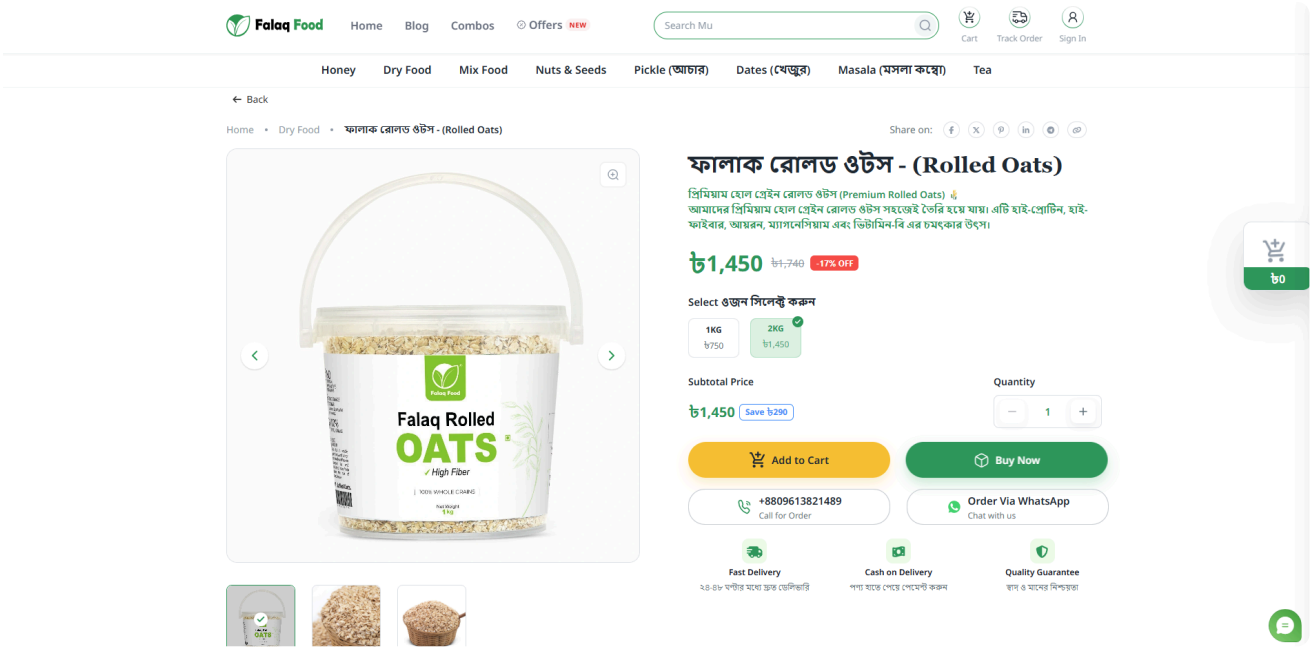

When a product is set to Out of Stock or its stock quantity becomes 0 in the Admin Panel, the storefront should reflect the same stock status and display the product as Out of Stock. The customer should not be able to purchase the product while its stock is 0.
